

Print document, cut to size, and fold along dotted line.
Plant care guide cards also available as a free handout in the garden store.

PLANT CARE GUIDE

Peace Lily

Spathiphyllum cochlearispathum

LIGHT

Easy going grower. Bright indirect light or low light. Direct light might burn the leaves.

TEMPERATURE

Anything between 60°-80°

SOIL

Regular potting soil, rich or poor (nutrient wise).

WATERING

Water every 7 – 10 days or when dry or when leaves start dropping. Very forgiving plant.

HUMIDITY

Anything between 20 – 100%

FERTILIZATION

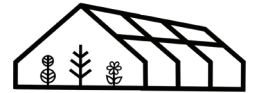

Any balanced fertilizer for houseplants (always follow producer's instructions).

ADDITIONAL INFO & TIPS

- + Best plant for beginners!
- + Naturally grows on the coastlines and in the rainforests of Southern Mexico.
- + Flowering is unpredictable and sporadic. Increasing any variables (light, fertilizers, etc.) *may* nudge flowering.
- + Can be grown in aquariums (aquaponics). Keeps water clean, reduces algae, and the roots give shelter for baby fish.

TOXICITY

Humans - Yes, if ingested in high volumes. Skin irritant. High toxicity to animals and birds.
